MODULE: FORENSIC MEDICINE

NUMBER OF CFU: 1

SSD: MED/43

PROFESSOR: MARGHERITA PALLOCCI

e-mail: margherita.pallocchi@gmail.com

Office hours (by appointment): Monday from 3 pm to 4 pm

PREREQUISITES

No prerequisites are needed in order to attend the course. Basic elements of microeconomics and macroeconomics will be provided during classes

LEARNING OBJECTIVES

Aim of the Teaching is to:

- Provide knowledge of the principal characteristics and determinants of the markets functioning, with a particular focus devoted to the study of the healthcare sector.
- To acquire knowledge about how an economic policy is designed and implemented with particular regard to the understanding of the relationships between health and economic growth.
- Provide knowledge about market failures to understand the role of governmental authorities in order to reduce social costs deriving from externalities, moral hazard, adverse selection and, in general, asymmetric information.
- illustrate the use of economic analysis and cost -benefit approach to evaluate public policies with particular focus to healthcare and the evaluation of new health professional roles.
- Provide students with a set of basic business tools, useful for understanding the managerial dynamics of both public and private structures.
- Provide students the general principles of ethics and of applied ethics for health professions
- Illustrate the ethics of care
- acquire knowledge about the fundamentals of the nursing ethics
- acquire knowledge about the meaning of the ethical codes for the health professions
- provide students with knowledge of the essential elements of forensic pathology and of the rules necessary to carry out the health profession.
- acquire knowledge of the legal obligations established by current legislation and to develop the ability to recognize which acts and events have or may have legal relevance.

LEARNING OUTCOMES

Knowledge and Understanding

At the end of this teaching the student will have to know:

- the role and the principal tools of the economic policy
- the effect of externalities, asymmetric information, moral hazard and adverse selection
- the principal determinants of economic growth with particular focus on the role of health policy
- the main characteristics of welfare systems
- the main elements of the economic analysis of public policies
- the economic analysis approach to the evaluation of healthcare
- Understand what a company is and how it works;
- the fundamental concepts of organizational, strategic and financial thinking;
- the dynamics of human resources and information technologies;
- the basic tools for planning and control.
- the main concepts in ethics and nursing ethics and of the values that this discipline includes.

- and comprehend the ethics of care as an ontological basis of the relational ethic between health professional and patient.
- and understand the meaning to draw up ethical codes for the health professions.
- the various fields of interest of forensic medicine.
- the characteristics of the various types of injury and identify the possible cause.
- the criminal and ethical obligations to which the health professional is subject.
- the basis of the regulations in force regarding the professional liability of the health care professional.

Applying knowledge and understanding

At the end of the teaching, the student will be able to:

- Use the economic analysis in order to understand and assess interventions and policies aimed to reduce social costs and improve welfare and well-being.
- use what he/she learnt to deepen autonomously aspects useful for his/her profession in the future, if he/she will deal with healthcare management.
- use the acquired knowledge for the autonomous deepening of aspects related to nursing ethics.
- use the acquired knowledge for the autonomous deepening of aspects related to the specific field to which the student will devote himself within the professional activity;

Communication skills

At the end of the teaching, the student will need to know:

- How to use the economic terms appropriately in order to describe and appraise the results of an economic analysis.
- How to use specific scientific terminology in nursing ethics and in the legal field in an appropriate manner.

Making judgements

At the end of the teaching, the student will need to know:

- how to make critical appraisal in order to assess the economic sustainability of public policies
- how to provide basic interpretations about firms trends and overall financial health.
- How to carry out general assessments of the topics covered.

COURSE SYLLABUS
