## European Vascular and Endovascular Neurosurgery Master Study Program

To remain at the forefront of evaluating, caring for, and treating patients with cerebrovascular disease, vascular neurosurgery must evolve toward a specialty, mastering the knife as well as the catheter.

### OBJECTIVE

The Course is designed to fulfil not only educational but also caring requirements; in particular, this is focused on microsurgery or endovascular treatment of brain and spine vascular malformations.

### TEACHING METHOD

The fellow will choose among **7 European Hosting Centers** where she/he will be trained in **open microvascular or endovascular neurosurgery**.

There will be **150 hours** of theoretical lessons and simulations and **800 hours** of clinical training, **40 hours** of hands-on sessions with by-pass models, clipping and endovascular simulators.

The international faculty consists of world renowned vascular and endovascular neurosurgeons that will provide insights into their clinical activities and experiences.

This **1-year Course** is targeted to Neurosurgeons interested in developing a real professional basis in the field of microsurgery and endovascular treatment of cerebral and spinal pathologies: residents in Neurosurgery PGY 4 or 5 with interest in vascular or endovascular procedures or young specialists are welcome.
