

## DEGREE IN MIDWIFERY

### Teaching: Gynecology and Obstetrics

SSD: MEDS-21/A, MEDS-24/C

Credits: 3

SSD: MEDS-21/A

Professor: [Elvio Marovello](mailto:elvio.marovello@unicamillus.org)

E-mail: [elvio.marovello@unicamillus.org](mailto:elvio.marovello@unicamillus.org)

Credits : 1

SSD: MEDS-24/C

Professor: [Sofia Colaceci](mailto:sofia.colaceci@unicamillus.org)

E-mail: [sofia.colaceci@unicamillus.org](mailto:sofia.colaceci@unicamillus.org)

Credits: 2

### PREREQUISITES

None.

### LEARNING OBJECTIVES

The learning objective is the knowledge of the anatomy and physiology of the female reproductive system and the main gynaecological diseases.

### LEARNING OUTCOMES

#### Knowledge and ability to understand

At the end of this teaching course the student will be able to:

- Describe the anatomy and physiology of the female reproductive system
- Describe the main gynaecological pathologies and complications

#### Applying knowledge and understanding

At the end of this teaching course the student will be able:

- To recognize the pathologies of the female reproductive system and the methods to diagnose and identify them
- To know the principles of a correct management of the main gynaecological diseases

#### Communication skills

At the end of this teaching course the student will be able to correctly use the scientific and clinical terminology applied to the above disorders

#### Making judgments

At the end of this teaching course the student will be able to correctly diagnose the above disorders.

#### Learning Skills

The student must be able to activate autonomous in-depth study paths by consulting scientific literature and obstetrics and gynecology texts.

### COURSE SYLLABUS

- Anatomy of the female reproductive system
  - Outline of the anatomy and physiology of the male genital system
  - Gynaecological endocrinology
  - Physiology of the female genital system
  - Gynaecological diagnosis
  - Malformative pathology of the female genital system
  - Menstrual changes
  - Climacteric syndrome
  - Hirsutism
  - Sterility
  - Sexology
  - Contraception
  - Phlogosis of the genital system
  - Non-inflammatory pathology of the uterus
  - Tumors
  - Gynaecological surgery
- 
- Research methodology
  - Reading and discussion of scientific articles in the obstetric field

#### **COURSE STRUCTURE**

The course will consist of n.42 hours of frontal lessons, which will be held according to the academic calendar.

#### **COURSE GRADE DETERMINATION**

The preparation and the skills of the students will be checked by an oral examination.

<b>FAIL</b>	Fragmented and superficial knowledge of the contents, errors in applying the concepts, poor exposition.
<b>PASS</b>	Sufficient and appropriate knowledge of the contents, clear and coherent exposition.

#### **OPTIONAL ACTIVITIES**

The students will be able to request a dedicated workshop to delve deeper into specific topics of interest.

#### **READING MATERIALS**

Materials delivered by the professor.
